

# ***Help to eradicate Feral Pigs and other Feral Animals from farms and local bushland !***

- **Report Sightings (form overleaf)**
- **Attend the Feral Pig Awareness Workshop**

Wilson Inlet Catchment Committee

## **Community-based Feral Pig Control Program**

Your cooperation is sought in reporting sightings or presence of feral pigs, wild deer, goats or other pest animal species.

- Feral pigs are posing the most ***serious threat*** to both ***agriculture*** and ***bushland*** areas.
- Over the past decade, there have been ***increased reports of feral pigs*** in the lower Great Southern.
- DNA studies show ***illegal introductions*** of feral pigs into bushland areas are still occurring.

A steering committee made up of farmers, Dept. of Agriculture, Local Government, CALM, and the timber industry is coordinating the feral control program. Significant success is being achieved by contractors employed to trap and eradicate pigs.

## **How you can help.**

1. Please report any sightings of pigs, evidence of their activity or other feral animals (i.e. deer, goat) to Lynn Heppell, NRM Coordinator Plantagenet Community Agriculture Centre, P.O. Box 118, Mt Barker, WA 6324 , Phone 9851 2697, Fax 9851 2709, Mobile 0428 531 015 or Email: [lheppell@agric.wa.gov.au](mailto:lheppell@agric.wa.gov.au) Lynn will forward the information onto the appropriate people for action.
2. When reporting sightings please provide an accurate description of the location, other relevant information, as well as your name and contact phone number. If a dead pig is located, please forward a sample (ie a very small piece of ear) to the Plantagenet Community Agriculture Centre who will place it in a preservative tube and forward it on to the WA dept of Agriculture for analysis as part of DNA studies.
3. Please also report information about any illicit pig or other feral animal introductions.

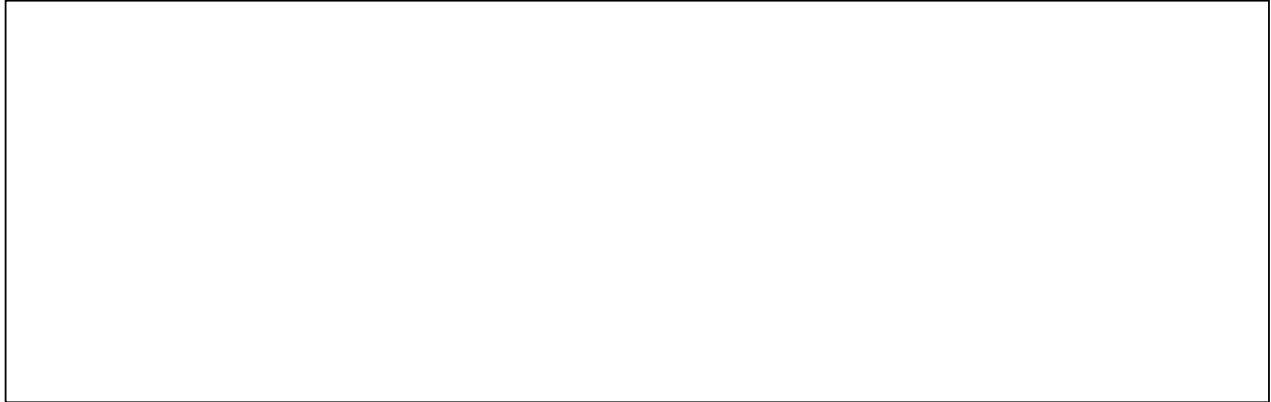

**THANK YOU.** Your assistance will ensure the success of future feral pig control programs.

***Please complete sightings form overleaf***
